

GREAT AUSSIE AMMONIUM SULFATE DIRECTIONS FOR USE

SITUATION	RATE	CRITICAL COMMENTS
Minimise antagonism to tank mixes with flowable herbicides.	800 g/100 L of spray solution.	Half fill spray tank with clean water and start agitation. Add Great Aussie Ammonium Sulfate Spray Grade Herbicide Adjuvant granules to spray tank.
Improve performance under adverse environmental conditions.		With agitation still running, add the required flowable herbicide to the tank and mix thoroughly. Add the required amount of Glyphosate-based product and the remaining water; mix thoroughly. Add surfactant, if required, near the end of the filling process to minimise foaming. Always maintain adequate agitation during application and use the tank mix promptly.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Great Aussie Ammonium Sulfate Spray Grade Herbicide Adjuvant should be used with non-selective herbicides only, as with some selective herbicides use may result in loss of selectivity and therefore crop damage. Ammonium Sulfate may be corrosive to metal parts of the sprayer. Thoroughly flush tanks, pumps and nozzles with water after use.

Great Aussie Ammonium Sulfate Spray Grade Herbicide Adjuvant is a completely soluble product. However, in circumstances of high humidity this product may “cake” when exposed to the air. Potential problems may include handling problems after the product is opened, storage problems, and problems with dissolution or blockage of spray nozzles in boom sprayer/equipment. To reduce the potential for caking, any opened, unused product should be immediately closed to limit exposure to the air. In the event that the product has caked, ensure the product is fully dissolved before spraying to avoid the potential for nozzle blockage. Dissolving the product through the top screen of the spray tank and ensuring the product is completely dissolved before spraying commences will eliminate the potential for nozzle blockage due to caked material.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Single-rinse or shake remainder into spray tank. Do not dispose of undiluted chemicals on site. Puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.
